Bruce F. Bell Primary Examiner Art Unit: 1746

of Biological Material

9. Other ____.

Application/Control Number: 09/954,601

Art Unit: 1746

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach and/or suggest a fluid distribution assembly having a fluid transport layer between a flow field active area and a target area of the MEA wherein the lateral flux of the active component varies no more than 35% through at least 90% of all overland portions of the fluid transport layer. In order for this to occur, the design of the flow field with minimal lands must be in contact with the fluid transport layer so that the fluid can be transported through the lands area to yield a more uniform distribution. A flow field device having at least one serpentine channel having at least two sequential major segments, which are non-parallel are also not taught or suggested. A flow field device having segments which are separated by land's area so that for any point on a first segment, there is a point on a second segment which is near the point on the first segment, so that the shortest distance between the first and second points increases monotonically with the distance between the first and second points measured as distance along the channel. A flow field having at least one channel with major segments being separated by land areas, wherein the areal size of the land areas decreases monotonically with distance from the inlet of the channel as measured along the channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 09/954,601

Art Unit: 1746

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
